Why a forklift license?

Forklift accident at cleaning detergent wholesale in Zutphen

Posted: Today 11:38

A 39-year-old inhabitant of Arnhem has been injured in a forklift accident. The accident occurred in the hall of Headcleaning, a cleaning detergent wholesale located at Krevelhorst industrial area in Zutphen.

The driver hit a gantry with the forklift after which the forklift toppled over. He was taken to Gelre hospital with solely head injuries. Because some acid leaked out the battery, the fire brigade was alerted. They ordered the employees to leave the building after which the acid was contained. According to a police spokesman the employees of the wholesale and the surrounding companies hadn't been exposed to a potential threat after all.

Forklift accident.

The Arbo act

Takes care of:	
	Safety
	Health
	Well-being

Forklift driver

	Employers and employees need to care for safety, health and well-being together
